## PRODUCT DATA SHEET

### RABBIT PLASMA NON-STERILE, W/ SODIUM EDTA

**Product Codes:**

31141-1

**Pack size:**

500 mL

**Description:**

Whole blood from healthy young rabbits (New Zealand White, 8-12 weeks of age, either sex, and fasted at time of slaughter), is mixed with 25 ml 2.5% Sodium EDTA then QS to 250 ml with blood. The plasma is separated from the blood cellular components by centrifugation. The plasma is pooled, bottled, and stored at or below -10 °C.

**Physical State:**

Frozen liquid

**Testing:**

Total Protein (g/dL): 5.0 - 7.0

Hemolysis (mg/dL): ≤ 20

pH: 7.0 - 8.5

Routine Coagulation: Pass

**Packaging, shipping/storage:**

**Packaging**

Polypropylene bottles

**Storage Temperature**

-10 °C or below

**Shipping Conditions**

Dry ice

**Expiration**

Product quality is guaranteed to meet Pel-Freez Biologicals' specifications for 1 year from the date of receipt by the customer as long as the product is stored in accordance with the indicated storage conditions.

**Application Notes:** Coagulase assays; coagulation controls, protein purification
