

PRODUCT DATA SHEET

Product Name: ANTI-GluR1 ANTIBODY

Product Code: P80000-100

Pack Size: 100 µL

Description: The ion channels activated by glutamate are typically divided into two classes. Those that are sensitive to N-methyl-D-aspartate (NMDA) are designated NMDA receptors (NMDAR) while those activated by α -amino-3-hydroxy-5-methyl-4-isoxalone propionic acid (AMPA) are known as AMPA receptors (AMPA). The AMPAR are comprised of four distinct glutamate receptor subunits designated (GluR1-4) and they play key roles in virtually all excitatory neurotransmission in the brain (Keinänen et al., 1990; Hollmann and Heinemann, 1994).

Physical State: Liquid; Buffer contents: 10 mM HEPES (pH 7.5), 150 mM NaCl, 100 µg per mL BSA and 50% glycerol

Storage/Stability: Stable at -20 °C for at least 1 year. For long term storage -20 °C is recommended

Purification Method: Protein G purified culture supernatant

Shipping Conditions: Domestic: Blue Ice
International: Blue Ice or Dry Ice

Host Species: Mouse (Monoclonal)

Isotype: IgG2a

Mr (kDa): 105

Immunogen: Peptide corresponding to amino acid residues from the N-terminal region of rat GluR1.

Species Reactivity: The antibody has been directly tested for reactivity in Western blots with mouse and rat tissue.

Recommended Antibody Dilutions:

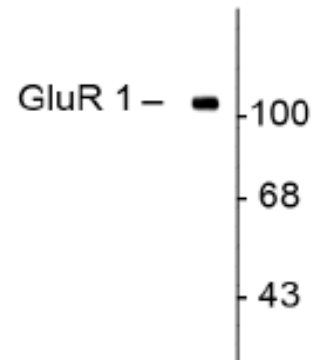

WB: 1:1000

Western Blot

Rat hippocampal lysate showing specific immunolabeling of the ~ 105k GluR1 protein.

Application Key: WB – Western Blot IF – Immunofluorescence IHC – Immunohistochemistry IP - Immunoprecipitation
